TECHNICAL INSPECTION REPORT

OVERALL SUMMARY

I. Target Condition After Test.

(a) Drafts after test, list, general areas of flooding, sources.

There was no flooding, hence no change in drafts or list. When the ship was inspected 19 days after the test, the main auxiliary machinery spaces contained about 12 inches of water. This is considered normal leakage.

(b) Structural damage.

HULL

The main deck has apparently suffered additional damage in the area surrounding the elevator. There is some deflection of the main deck and slight distortion of the girder brackets.

MACHINERY

No comment.

ELECTRICAL

No structural damage occurred to effect the electrical plant.

DETAILED DESCRIPTION OF HULL DAMAGE

A. General Description of Hull Damage.

The only damage is that to the main deck in way of the forward hatch opening. General views of the ship are on pages 28 and 29.

B. Superstructure.

No damage.

C. Turrets, Guns and Directors.

No damage.

D. Torpedo Mounts, Depth Charge Gear.

Not applicable.

E. Weather Deck.

The main deck suffered slight deflection in way of the forward hatch. Deflection scratch gages indicate about two inch deflection at the centerline. This is accompanied by distortion of the girder bracket connections. There is no other damage.

F. Exterior Hull.

No damage.

G. Interior Compartments (Above Waterline).

No damage.

SECTION II - MACHINERY

GENERAL SUMMARY OF MACHINERY DAMAGE

I. Target Condition After Test.

(a) Drafts after test; list; general areas of flooding, sources.

No data taken by machinery group.

(b) Structural damage.

No comment.

(c) Other damage.

There was no damage to the machinery of LST-52 during Test B, insofar as can be determined by visual inspection. It was not practicable to operate machinery on this vessel after Test B because of radioactivity, which was high when the ship was inspected 19 days after Test B.

DETAILED DESCRIPTION OF MACHINERY DAMAGE

A. General Description of Machinery Damage.

(a) Overall condition.

The overall condition of the machinery of this vessel was not changed by Test B, insofar as can be determined by visual inspection.

(b) Areas of major damage.

None.

(c) Primary cause of damage in each area of major damage.

Not Applicable.

(d) Effect of target test on overall operation of machinery plant.

The test had no effect upon the overall operation of the machinery plant.

NOTE: No machinery on this vessel was operated after Test B.

REPORT # 5

SECTION - 1

Due to the very short period I was allowed to be aboard my ship to inspect. There appeared to be no added damage to the hull of ship's structure than has been previously reported after Test A.

All machinery seemed to be intact as far as could be determined, no machinery was tested due to batteries being runned down.
